PROFILE

Technical Product Manager in AI product development with previous AI/ML and MLOps engineering experience. Passionate about turning data and AI models into business value while keeping a close eye on automation and efficiency. Seeking an innovative and impactful remote role bridging product strategy and technical execution.

WORK EXPERIENCE

Technical Product Manager

2025 -
Hybrid

Aumovio (successor of Continental Autonomous Mobility)

- Owning e2e delivery across data engineering, data management, AI development, embedded integration, and testing (30+ engineers, 4 cross-functional agile teams).
- Introducing automated KPI and software-in-the-loop (SiL) quality monitoring, directly linking data and AI KPIs to system performance.
- Driving the synthetic data roadmap as primary stakeholder and leading large-scale data acquisition strategy across three continents.
- Leading architectural evolution by incorporating event-driven AWS data pipelines and next-generation CNN architectures.

Senior Technical Product Owner / Team Lead

2024 - 2025
Hybrid

Continental Autonomous Mobility

- Led AI and embedded development (2 teams, 15+ engineers) within an agile environment.
- Translated customer and system requirements into technical roadmaps and delivery plans across the two teams.
- Built PoCs and drove the adoption of MLOps initiatives to automate release pipelines and software quality validation.
- Owned team and component-level compliance requirements and software quality.

Senior MLOps Engineer / MLOps Product Owner

2023 - 2024
Hybrid

Continental Autonomous Mobility

- Led the company's first comprehensive MLOps maturity analysis and defined MLOps strategy and technical roadmap.
- Led adoption of Docker, Kubernetes, GitHub Actions, Apache Airflow, and automation approaches to facilitate and standardize AI development across 20+ AI projects.
- Designed on-prem GPU efficiency initiatives, and led the annual maintenance and upgrade of the on-prem NVIDIA cluster, supporting 300+ end users.

Machine Learning Engineer

2021 - 2023
Hybrid

EPAM Systems

- Developed production ML models for image-based classification and tabular-based pricing optimization in retail and marketing systems.
- Designed and implemented end-to-end MLOps pipelines for data processing, model training, data monitoring, and automated deployment.
- Worked on early NLP systems for entity recognition and text classification.

Machine Learning Engineer / Operations Team Lead

2019 - 2021
Remote

Innovative Language Learning

- Built and deployed a BERT-based customer support classification system, automating ~95% of previous manual support handling.
- Designed and implemented an AWS-based automated error detection and correction system for ongoing quality assurance of user-facing website content.
- Led production and quality assurance operations across an international 25-person team.

EDUCATION

MScBA Master in Management

2018 - 2019

Rotterdam School of Management, Erasmus University
GPA: 4.0 / 4.0

Mechatronics Engineering BSc

2014 - 2018

Budapest University of Technology and Economics
GPA: 4.0 / 4.0
